

PORTABLE AIR PURIFIER

Guardian Angel

The Guardian Angel is a portable, True HEPA air purifier that reduces 99.97% of airborne contaminants as small as 0.3 microns. The Guardian Angel's 4-Stage filtration has industry-leading technology that provides powerful air protection. Our system protects against harmful contaminants such as mold, bacteria, and viruses. The Guardian Angel is the perfect air purifier for small to medium interior spaces.

FEATURES + SPECIFICATIONS

-  Coverage up to 1,000 ft² (92 m²) depending on occupant density and other factors. High density commercial settings not to exceed 375 ft² (35 m²).¹
-  Meets the strict ozone emissions limits set by the California Air Resources Board (CARB Certified), UL 867, and UL 2998.
-  Up to 120 CFM (4-speed brushless motor)
-  18.7" H x 10" Diameter (47.6 cm x 25.4 cm Diameter)
-  Model: F179A
SKU: 00616
-  9.2 lbs (4.2kg)
-  16 Watts - 28 Watts Power Consumption
-  Low: 35 dB(A)
High: 55 dB(A)

Powered By PCO Technology

Photocatalytic Oxidation uses UV and a titanium dioxide catalyst to break down pollutants into harmless molecules, which are then captured by the air purifier's filtration system.

True HEPA

4-Stage True HEPA filtration system can capture airborne particles as small as 0.3 microns.

Activated Carbon

Porous carbon filtration eliminates odors and protects against smoke, harmful VOCs, and gases.

*PCO Technology does not replace the need to follow CDC guidance and should be used as a complementary technology.

PORTABLE AIR PURIFIER

Guardian Angel

GUARDIAN ANGEL BENEFITS

Quiet Operation: The Guardian Angel air purifier is perfect True HEPA solution for any interior space and can operate quietly in the background with its high-quality brushless motor.

Versatile Design: Compact, portable, and versatile in design. The Guardian Angel can be placed in virtually any space to provide additional air exchanges and high-quality air filtration.

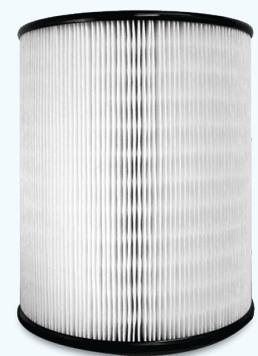

Energy-Efficient Performance: As an Energy Star-certified product, the Guardian Angel uses fewer watts of power per hour, even during continuous 24/7 operation.

True HEPA Filtration: No technology provides better air filtration than a True HEPA Filter. True HEPA Filters offer proven and unrivaled performance in reducing over 99.97% of airborne contaminants 0.3 microns in size.

Activated Carbon: Acting as secondary filtration to True HEPA, Activated Carbon is engineered to be porous, and adsorb odors, harmful gases, and volatile organic compounds (VOCs).

Photocatalytic UV-C (PCO): Featuring Photocatalytic Oxidation Technology (PCO), the Guardian Angel uses an LED UV light and titanium dioxide as a catalyst to remove airborne contaminants.

Negative Ionization: Using Negative Ionization, the Guardian Angel attracts air particulate and clumps them together for easier capture during the filtration process.

**True HEPA Filter
With Activated Carbon
(12 Months)***

**Washable Mesh
Fabric Pre-Filter
(6 Months)***

5 Year Limited Warranty (Terms & Conditions Apply)

1. Recommended maximum coverage in a contiguous space: Assumes 8 foot ceilings. Solutions should be customized based upon a variety of factors including HVAC system capabilities and settings, air flows taking into account walls, air pressure, and doors, ambient air temperatures and humidities, variable density, known VOC concentrations, other layers of protection, and worst case desired outcomes.

*General recommended replacement guidelines. Frequency is dependent on occupancy density, and indoor environmental conditions. Systems may require more frequent servicing.
